

HOMESTAKE MINING COMPANY REMOVAL ASSESSMENT

Homestake properties that have elevated readings from something besides soil

MA0046: Landscaping rocks surrounding fish pond on NE corner of yard; 75,000 – 200,000 CPM

MA0048: Brick path in backyard; ~24,000 CPM

MA0091: Limestone stockpile southwest of residence and adjacent to wooden storage structure; ~184,000 CPM

BV0066: Limestone rocks (up to ~650,000 CPM) 18' long, 5' wide, 1' high

BV0117: No visible rocks; ~160,000 CPM area adjacent to middle of trailer (north side); high microR readings (~60,000 CPM) detected inside same area of structure during radon sampling.

BV0123: Pipe west of the house, near the garage.

BV0137: Petrified wood with elevated readings. 5/30 - One very large piece next to the garage. A quick scan read over 30,000 cpm. Did not scan the whole thing due to the aggressive dog.

BV0143: Two pieces of petrified wood; ~350,000 CPM

MA0094: Oxidized steel piping located ~300 ft. south of the residence against the east fence. Came from the mines. 80,000 cpm at 10 inches above.

VV0040: Petrified wood located ~3 ft. north of sample location 23. 1-min count = 67,679 cpm.
